Upton Trust Farm Inc. AGM 2022

This statement reflects another year of limited activity with Covid restrictions still in place. It was however encouraging to see that even with restrictions there were always lots of visitors each day on the farm. The new website process makes it easy to join the membership and pay online as well as donate in memory or gift. This year, Tree Canada provided funds to Upton for the maintenance of the newly planted trees in various areas. The fields were readied for planting and supplies were also provided through the funding provided. Upton continues to investigate projects such as tree planting that help to keep the natural vision and enhancement of the farm. The 2021/2022 bank statement reflects another year of limited expenditures with funding from government remittances to follow.
